

# Pass-Through Windows from Kolbe

Kolbe's **folding and quad sliding windows** provide innovative solutions for enhanced indoor-outdoor living. Perfect for residential or commercial applications, these pass-through windows expand living spaces to the outdoors while capturing views and ventilation. Unique configurations are available in various wood species and finishes, with numerous options and custom solutions.

## Folding Windows

Folding windows offer expansive openings that are perfect for entertaining indoors and out. The panels can all fold to one side, or split and fold to either side in a bi-parting operation. An optional swinging sash is available for easy access without having to fold open the entire unit. Add a pleated retractable screen to keep insects out and enjoy the views of any locale.

For maximum openings up to 52' wide by 6' high\*

## Quad Sliding Windows

Center-opening quad sliding windows allow indoor-outdoor living in situations where space is at a premium. A double-wide opening enhances pass-through service, without sash interfering with the living area. Add a retractable screen to enjoy fresh air while keeping insects out.

For maximum openings up to 14' wide by 6' high\*

\*Please consult your local Kolbe dealer for specific product details and configurations.
