

Kolbe's NEW Stretta™ Sliding Door

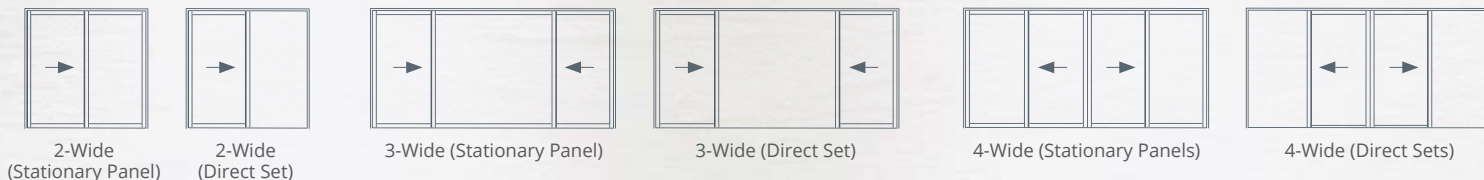

Photo © Russell Abraham Photography

Kolbe is proud to introduce the **Stretta™ sliding door** as part of its expanded VistaLuxe® WD LINE. This innovative door features expansive panels that glide effortlessly, ensuring smooth operation. The advanced perimeter locking system creates a secure seal around all four sides when closed, significantly enhancing performance against air, water, and noise infiltration. This ensures a quieter, more comfortable living environment and improved energy efficiency.

The Soft Function feature ensures controlled and smooth movement of the operating panel through gentle braking during both the opening and closing of the door. This feature is automatically applied to doors over a certain weight, while for lighter doors, it is available as an optional upgrade.

CONFIGURATIONS Kolbe's Stretta sliding door is available in 2-, 3- or 4-panel bi-parting configurations, with maximum panel widths up to 118" and maximum panel heights up to 141".

NOTE: Not available for pocketing configurations. Please consult your local Kolbe dealer for specific product details.

HOPPE® HARDWARE STYLES & FINISHES

All configurations are offered with a choice of lever styles or a 180° Inset Handle with a flush pull. Choose from interior lever style handles with an exterior pull, or pair up the Dallas interior handle with a coordinating Dallas exterior handle.
